EXAMINER'S COMMENT

1. Applicant's arguments, see pages 8 and 9 of remarks, filed 5/9/2005, with respect to specification and §112 rejections have been fully considered and are persuasive. The rejections of §112 has been withdrawn since present application incorporates U.S. Patent Application 10/254,036, which is now U.S. Patent Number 6,698,213 and U.S. Patent Application 10/254,025, which is now U.S. Patent Number 6,684,646. In regarding to the double patenting of claims 18-32 (Item 18), Examiner inadvertently typed the wrong patent number. The patent should be 6,698,213. However, this rejection is withdrawn because Applicant filed Terminal disclaimer of this patent 6,698,213 for claims 10-17 double patent rejection (Item 19).

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The prior art of record when considered as a whole, alone or in combination, neither anticipates nor renders obvious the recited container material connectable to a support member having a handle and within the temperature control unit to allow the contact area to contact a heat transfer surface separate from the support member to allow heat transfer between the heat transfer between the heat transfer surface and the biopharmaceutical material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
